

60. For use in the method of claim 25, a decoder which includes a timer, an input to receive the transmission word, a decryption unit to decrypt the transmission word and obtain the transmitted timer information, memory to store the timer relationship value and a comparison unit to compare the transmitted timer information to time information generated by the decoder timer and to the stored timer relationship value, and means, responsive to the comparison unit, to activate an output if certain criteria are met in the comparison. - -

A1
Concl.

REMARKS

This Amendment presents a new set of claims to be examined in place of the original claim set.

Respectfully submitted,

By: William A. Blake
